

ABSTRACT

Alumni management comprises a foundational database for storing alumni information, enabling effective tracking of engagement and seamless sharing of data among colleagues. The systems have traditionally focused on basic communication and event coordination. “Alunexus” is an innovative web application crafted to redefine alumni engagement. Offering dedicated discussion forums, tailored to connect with college through events, the system serves as a vital hub for alumni interaction and networking. With its intuitive interface, alumni can easily connect with fellow graduates, share insights, and stay updated on upcoming events and news within the alumni community. Our platform facilitates the sharing of job referrals and career opportunities among alumni, empowering professional growth and advancement. Job seekers can explore curated job listings tailored to their preferences and apply for the jobs. In the discussion forum, each department has its own dedicated space, enabling alumni to interact effectively with their peers. This segmented approach fosters focused discussions on relevant topics. It has a separate chat interface allows for personalized communication between individuals within each department, facilitating direct interaction and connection-building among alumni. It is the ultimate tool for alumni to connect, grow, and succeed in their personal and professional endeavors.
